SuperEx-Pro System Options:

Change the standard 950-TTX-900Hand to the 950-TTX-900WHND with belt clip

- **950-TTX-UPGRADE** Wireless 900 MHz Body worn panic button **\$15.00 Each**

This 900MHz, single-button water-resistant pendant is one of our smallest, lightest, and most versatile pendants. Weighing less than 1.4 ounces, it comes with a neck cord and belt clip and can be easily converted by the end user. With the single-button, "press and hold" activation, and compact design, it is ideal for assisted living installations and at-risk personnel in any commercial application. Like all pendants, it features a fully supervised radio link to help ensure reliability.

- **950-TTX-CODEBLU** Wireless 900 MHz Large Wall Mounted Alarm **\$345.00**

or

Indoor

950-TTX-CODEBLU These custom built, indoor, wall mountable panic buttons are designed to be placed in specific locations that need a very visible alarm. We build standard CODE BLUE and PANIC BUTTON. Optional custom buttons are available. 7.25"(W) x 5"(H) x 1.5" (D)

Extra Buttons (More than one button can be on one channel)

- **950-TTX-900HAND** **\$130.00**

Wireless Panic Buttons pre-programmed and labeled for easy installation

The 950-TTX-900Hand has a sleek, smart design with simple, single-button activation. The LED flashes on all transmissions, including supervision, so the user has a visual signal that the unit is transmitting and the pendant can be supervised. This pendant transmitter comes with a neck cord or can easily be mounted for fixed-position signaling. Uses a 3V lithium battery that is end user replaceable.

- **950-REPEATER-0** Wireless 900MHz Signal Repeater **\$650.00**

Repeaters receive a signal from any wireless transmitter, verifies it, and then amplifies the signal back to peak power. It is easy to install, with no programming required. Just "plug and play" to extend range, even in large installations. It can also be supervised. This transceiver is a practical wireless solution for "open-air" installations such as campuses, multi-story buildings, office complexes, and other large wireless projects. Comes with 14 VAC/20 VA transformer.

Extra Receivers available (need to be pre-programmed with the buttons)
